Professional

The HQ Professional Maxi-Plex System is the ideal solution for maintaining hair resilience and health during chemical services. It protects hair structure and blocks damage to avoid hair breakage and preserve natural condition.

### STEP 1 - HAIR CONDITIONING FORTIFIER

600ml

HQ Pro Hair Conditioning Fortifier has been developed with Collagen Amino Acids and Keratin to restore and fortify the hair from the inside out. Its unique formula interrupts the process of breaking and blunting the hair fibre. Its Amino acids microfilaments act on the fibre providing greater elasticity, shine, softness and vitality to the hair.

**Before chemical services:**

Add 4ml of Step 1 - Hair Conditioning Fortifier for every 20ml of purified water into a spray bottle and apply to hair. Blow-dry then proceed with chemical service.

**During chemical services:**

After composing mixture for chemical service, add in Step 1 - Hair Conditioning Fortifier (10% worth of total mixture amount) to avoid damage.

### STEP 2 - HAIR RESTRUCTURER

600ml

HQ Pro Hair Restructurer (Step 2) has been designed with an intelligent system of internal and external reconstruction of the hair fiber, plus with extra protection against future mechanical, thermal and oxidative damage. It returns the mass lost to the hair fibre during chemical processes, for hair resulting in shine and natural softness.

**Recommended for use after:**

- Bleaching services
- Colouring services
- Chemical hair transformation services

**Instructions:**

After chemical service, wash hair twice and towel dry. At the basin, apply and massage Step 2 - Hair Restructurer section-by-section from roots to ends. Leave for 10 minutes then rinse thoroughly. Administer a heat protector then style as desired.
